

CERTIFICATE OF IMMUNIZATION - COLLEGE/UNIVERSITY

cdphe.colorado.gov/immunization

COLORADO
Department of Public Health & Environment

This form is to be completed by health care providers or their designated staff, and signed by a health care provider (physician [MD, DO], advanced practice nurse [APN], or delegated physician's assistant [PA]). If the student provides an immunization record in any other format apart from this Certificate or an Approved Alternate Certificate (details found at cdphe.colorado.gov/immunization/forms), the school health authority must transcribe the record onto this form.

Student Name: _____

Date of Birth: _____

Required vaccines	Immunization date(s)			Titer date*
	MM/DD/YY	MM/DD/YY	MM/DD/YY	MM/DD/YY
MMR ¹ Measles, Mumps, Rubella				
Measles ¹				
Mumps ¹				
Rubella ¹				
MenACWY ² Meningococcal ACWY				

¹ Prior to school entry for those attending in-person, two valid doses of measles, mumps, and rubella (MMR) vaccine are required for students born on or after January 1, 1957. To exempt from receiving MMR vaccine, a Certificate of Exemption must be submitted to the college/university following guidance found at: cdphe.colorado.gov/vaccine-exemptions.

² All new college or university students residing in student housing are required to review information concerning meningococcal disease and meningococcal vaccine. There are two ways to meet the meningococcal requirement:

1. Documentation of a meningococcal ACWY vaccine within the last five years **OR**
2. Signing the waiver found on page two of this document.

*Laboratory confirmation of positive titers are an acceptable alternative to the MMR vaccine only when titers for all three components (measles, mumps, and rubella) are positive. If any single titer is negative, the student must be vaccinated with an age-appropriate MMR vaccine series meeting the Advisory Committee on Immunization Practices' (ACIP) minimum intervals or provide the school with a Certificate of Exemption for the component(s) for which the titer is negative. More information on exemptions can be found at cdphe.colorado.gov/vaccine-exemptions.

Recommended vaccines	Immunization date(s)				Titer date [†]	
	MM/DD/YY	MM/DD/YY	MM/DD/YY	MM/DD/YY	MM/DD/YY	MM/DD/YY
Tdap Tetanus, Diphtheria, Pertussis						
Td Tetanus, Diphtheria						
IPV/OPV Polio						
HepA Hepatitis A						
HepB Hepatitis B						
MenB Meningococcal B						
HPV Human Papillomavirus						
Flu Influenza						
COVID-19						
Varicella Chickenpox				Varicella Disease Date	Positive Screen Date	
Other						

[†] A positive laboratory titer report must be provided to document immunity. The shaded area under "titer date" indicates that a titer is not an acceptable alternative to the vaccine.

Health care provider printed name/signature: _____ / _____

Date: _____

Student is current on required immunizations for age (circle one): OR Yes No
Immunization record transcribed/reviewed by school health authority:

School health authority signature or stamp: _____

Date: _____

(Optional) I authorize my/my student's school to share my/my student's immunization records with state/local public health agencies and the Colorado Immunization Information System, the state's secure, confidential immunization registry.
Parent, guardian, or student (if emancipated or 18+ years of age) signature: _____ Date: _____

Meningococcal Disease Information and Vaccine Waiver

Colorado law, Section 23-5-128, C.R.S., requires all public or nonpublic postsecondary education institutions in Colorado to provide information concerning meningococcal disease and meningococcal vaccine to each new college or university student residing in student housing, or to the college or university student's parent or legal guardian if the college or university student is under 18 years. "New student" means any incoming freshman student residing in student housing, as defined by the institution, or any student the institution requires to complete and return a standard immunization record indicating the vaccines received by the student, as a requirement for residing in student housing.

- Meningococcal disease is a serious disease and refers to any illness caused by bacteria called *Neisseria meningitidis*. These illnesses are often severe, can be deadly, and include infections of the lining of the brain and spinal cord (meningitis) and sometimes the bloodstream.
- Even when treated with appropriate antibiotic therapy, meningococcal disease kills 10 to 15 out of 100 people who are infected. As many as 20% of survivors will have permanent conditions such as hearing loss, brain damage, kidney damage, amputations, nervous system problems, and scarring from skin grafts.
- Meningococcal disease is contagious, but largely preventable. Keeping up to date with recommended vaccines is one of the best ways to protect against meningococcal disease.
- While anyone can get meningococcal disease, new college and university students living in student housing are considered to have an increased risk for meningococcal disease.

There are two types of meningococcal vaccines available in the U.S.	
<i>MenACWY (vaccine or a signed waiver is required)</i>	<i>MenB (not required for school entry)</i>
<ul style="list-style-type: none"> • Can prevent four types of meningococcal disease and is routinely recommended for children and adolescents. • <u>New college students living in residence halls should receive at least one dose of MenACWY within five years prior to college entry.</u> 	<ul style="list-style-type: none"> • Can prevent serogroup B meningococcal disease, which is relatively rare, though outbreaks have occurred at several U.S. colleges. • Health care providers, the student, and/or their parent(s) or guardian(s) should discuss the risk of the disease and weigh the benefits and risks of vaccination.

- A vaccine, like any medicine, can cause mild side effects. If they occur, these symptoms usually get better on their own within one to two days. Serious reactions are possible but rare. **Getting a meningococcal vaccine is much safer than getting the disease.** For more information, go to: <https://www.cdc.gov/vaccines/vpd/mening/public-adolescent-vaccine.html>.

To get vaccinated against meningococcal disease or to discuss the benefits and risks of vaccination, students should check with their health care provider. This website <https://cdphe.colorado.gov/immunizations/get-vaccinated> offers resources for locating vaccines.

New students living in residence halls who have not received a MenACWY vaccine within five years prior to college entry AND who do NOT wish to be vaccinated **must** check the box and sign below to indicate they have reviewed this information and decided not to obtain a vaccine for protection against meningococcal disease. NOTE: Parents/guardians must sign if their student is under 18 years of age.

Meningococcal Vaccine (MenACWY) Waiver	
<input type="checkbox"/> Check to indicate you have reviewed information on meningococcal disease and have decided the student will not receive MenACWY vaccine to protect against meningococcal disease.
